

Technical Rider for DJ Safri

Clubs, venues, festivals, corporate- & private parties:

A standard DJ setup with:

- **Soundsystem** (speakers & amplifier(s)), high quality with sufficient power & headroom.
- **DJ mixer**, professional quality: Pioneer, Xone, Denon, Dateq or similar, with at least 4 stereo line-channels.
- **CD players**, two with pitch control (preferably Pioneer or Denon)
- **Monitor speaker(s)**, one (or better: two) near the DJ setup, level controllable from the DJ mixer.
- **Microphone**, dynamic (Shure SM-58 or similar), connected to the mic input of the DJ mixer.

Please note: DJ Safri will bring a laptop (Apple) with external controller/audio interface (Denon MC6000). Therefore he'll need **one free stereo input** (line-level) on the DJ mixer. Cables to connect this laptop setup he'll bring himself. A free space of at least 50cm (w) x 50cm (d) is necessary near the DJ setup. Height should be around 90-100 cm. Also 2x free 230V powersockets are necessary.

Small parties (<100 people):

On small (non-commercial) events DJ Safri can perform with just his laptop setup and do without the CD players, DJ Mixer and in some cases even the monitor speaker. However, he always needs a proper soundsystem! When this is not available contact him well before to arrange things.

In case of questions, please contact Safri directly. Contact info below.
